Welcome to Rowan Class!

We've made a great start to the year and have learnt lots of exciting new things already.

We began the year by looking for information about our class namesake: the Rowan tree. We discovered that the rowan tree usually grows up to 15m in height (so we had to go and find out how tall 15m looks by measuring across the playground – it's taller than you think!). We also learnt that it can live for up to 200 years, the tree bark is smooth and silvery grey, and leaf buds are purple and hairy.

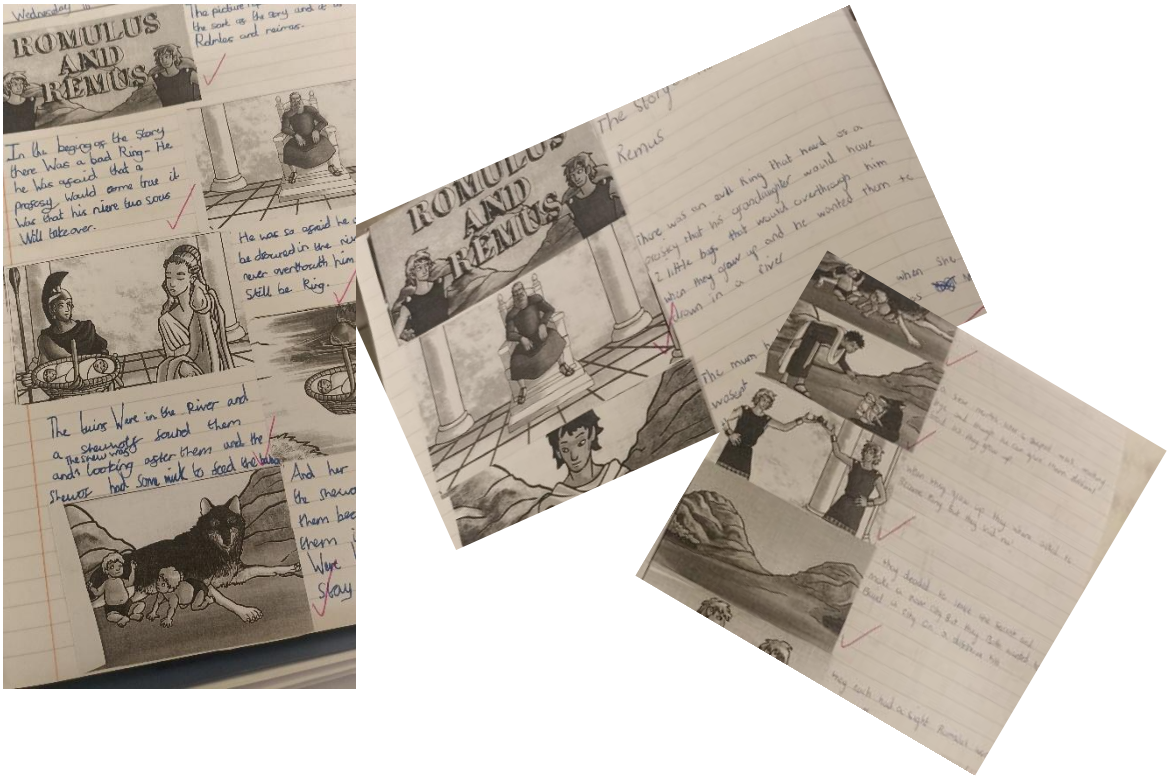

We decided to try out the watercolour paints and pencils as we created our impressionistic pictures of a rowan tree in our sketchbooks and these look great up on the display boards in the classroom.

We've also made a great start on our Romans topic and have enjoyed putting the romans into our timeline. We've discovered all about the origins of Rome and the story of Romulus and Remus.

Here in Rowan Class we have also been lucky enough to hear about some fabulous things in our Let's Present sessions, where the children have been sharing information about their hobbies and interests. Something that came out of one talk was that we all got to paint our own rock and then hide them all around the school and grounds for other children to find.
